

# TABLE OF CONTENTS

# (VOLUME 1)

EXECUTIVE SUMMARY ..... E.1

## **1.0 INTRODUCTION ..... 1-1**

1.1 PROJECT TITLE AND PROPONENT .....1-5

1.2 PROJECT OVERVIEW .....1-5

    1.2.1 About the Sisson Deposit .....1-5

    1.2.2 Project Summary and Location .....1-6

    1.2.3 Project Schedule .....1-10

1.3 PROJECT APPROACH AND COMMITMENTS .....1-10

    1.3.1 Project Team .....1-11

    1.3.2 Principles of Responsible Mineral Development .....1-12

    1.3.3 Project Governance and Oversight .....1-12

    1.3.4 Public, Stakeholder, and Aboriginal Engagement .....1-12

    1.3.5 Sustainable Development and the Precautionary Approach .....1-14

    1.3.6 Benefits to Canadians .....1-16

1.4 PURPOSE AND ORGANIZATION OF THE EIA REPORT .....1-18

    1.4.1 Tables of Concordance .....1-19

## **2.0 PROJECT PLANNING AND MANAGEMENT ..... 2-1**

2.1 ABOUT SISSON MINES LTD. ....2-1

2.2 ABOUT TUNGSTEN AND MOLYBDENUM.....2-1

    2.2.1 Tungsten .....2-1

    2.2.2 Molybdenum.....2-4

2.3 RATIONALE AND NEED FOR THE PROJECT.....2-6

2.4 PROJECT PURPOSE.....2-7

2.5 PROJECT ALTERNATIVES .....2-7

    2.5.1 Alternatives to the Project .....2-7

    2.5.2 Alternative Means of Carrying Out the Project .....2-7

2.6 PROJECT PLANNING AND MANAGEMENT STRATEGIES .....2-7

    2.6.1 Design Standards and Codes .....2-8

    2.6.2 Environmental Protection Measures .....2-8

    2.6.3 Planning for Closure.....2-9

    2.6.4 Follow-up and Monitoring Program .....2-10

2.7 THE ROLE OF THE EIA REPORT .....2-10

## **3.0 PROJECT DESCRIPTION ..... 3-1**

3.1 OVERVIEW.....3-1

    3.1.1 Project Summary.....3-1

    3.1.2 Geographic Location .....3-2

        3.1.2.1 Property Ownership.....3-2

3.1.2.2	Land Tenure .....	3-2
3.1.3	The Sisson Deposit .....	3-4
3.1.3.1	Property History .....	3-4
3.1.3.2	Deposit Geology .....	3-5
3.1.3.3	Geological Resource and Mine Life.....	3-9
3.1.4	Project Schedule .....	3-10
3.2	DESCRIPTION OF MAJOR PROJECT COMPONENTS AND FACILITIES.....	3-10
3.2.1	Development of Project Design Since April 2011.....	3-12
3.2.2	Open Pit Mine.....	3-14
3.2.2.1	Mine Development and Mining Methods .....	3-14
3.2.2.1.1	Open Pit Design .....	3-15
3.2.2.2	Blasting and Ore Extraction.....	3-16
3.2.2.3	Primary Crushing and Conveying to Ore Processing Plant.....	3-16
3.2.2.4	Mobile Equipment Fleet.....	3-17
3.2.2.5	Stockpiles and Storage Areas .....	3-17
3.2.3	Ore Processing Plant .....	3-17
3.2.3.1	Concentrator Process Facilities.....	3-18
3.2.3.2	Reclaim Water Clarification .....	3-20
3.2.3.3	Tailings Disposal .....	3-20
3.2.3.4	Ammonium Paratungstate (APT) Production Facilities .....	3-20
3.2.3.5	Reagent Storage .....	3-22
3.2.4	Mine Waste and Water Management.....	3-22
3.2.4.1	Mine Waste.....	3-22
3.2.4.2	Water Management.....	3-22
3.2.4.3	Tailings Storage Facility (TSF) .....	3-23
3.2.4.3.1	Overview .....	3-23
3.2.4.3.2	Elements of the TSF .....	3-24
3.2.4.3.3	Design Basis for the TSF .....	3-27
3.2.5	Ancillary Facilities.....	3-30
3.2.5.1	On-Site Buildings.....	3-30
3.2.5.1.1	Process Buildings .....	3-30
3.2.5.1.2	Administration Building .....	3-32
3.2.5.1.3	Laboratory Building .....	3-32
3.2.5.1.4	Truck Shop and Warehouse .....	3-33
3.2.5.1.5	Fuel Storage and Distribution .....	3-34
3.2.5.1.6	Site Mixed Explosives (SME) Plant and Storage .....	3-34
3.2.5.2	Process Control System .....	3-36
3.2.5.3	Access Roads.....	3-36
3.2.5.3.1	Existing Road Network.....	3-36
3.2.5.3.2	Realignment of the Fire Road .....	3-39
3.2.5.3.3	Site Access Road.....	3-39
3.2.5.3.4	Internal Site Roads .....	3-39
3.2.5.4	Water Supply and Distribution .....	3-39

3.2.5.4.1	Process Water .....	3-40
3.2.5.4.2	Fresh Water .....	3-40
3.2.5.4.3	Fire Protection.....	3-40
3.2.5.5	Sewage Treatment and Garbage Disposal .....	3-43
3.2.5.6	Security and Fencing.....	3-43
3.2.5.7	Power Supply .....	3-43
3.2.5.8	Quarry.....	3-48
3.2.5.9	Logistics and Transportation .....	3-48
3.3	ALTERNATIVE MEANS OF CARRYING OUT THE PROJECT .....	3-48
3.3.1	Project Location and Mining Method .....	3-48
3.3.2	Alternative Locations for Processing Plant.....	3-49
3.3.3	Alternative Locations for Tailings Storage Facility.....	3-49
3.3.3.1	Tailings Management Objectives .....	3-49
3.3.3.2	Site Selection Criteria .....	3-50
3.3.3.3	Evaluation of Alternatives against Site Selection Criteria for Technical and Economic Feasibility and Environmental Effects .....	3-50
3.3.3.4	Evaluation of TSF Site Alternatives .....	3-55
3.3.3.5	Factors for Analyzing TSF Site Alternatives .....	3-55
3.3.3.5.1	Environmental Factors .....	3-56
3.3.3.5.2	Technical Factors.....	3-61
3.3.3.5.3	Economic Factors .....	3-63
3.3.3.5.4	Other Factors Considered.....	3-63
3.3.3.6	Scoring and Weighting the Factors in Comparing the TSF Site Alternatives.....	3-65
3.3.3.7	TSF Site Alternatives Analysis Results .....	3-65
3.3.4	Alternative Tailings Management Technologies.....	3-67
3.3.4.1	Conventional Slurry Tailings.....	3-67
3.3.4.2	Thickened (Paste) Tailings Disposal .....	3-68
3.3.4.3	Filtered Dry Stack Tailings Disposal.....	3-68
3.3.4.4	Summary .....	3-70
3.3.5	Alternative TSF Embankment Designs .....	3-70
3.3.6	Alternatives for Low Grade Ore Storage and Waste Rock Storage .....	3-73
3.3.7	Alternative Means and Routes for Transporting Personnel, Equipment, Supplies, Materials, and Products.....	3-73
3.3.8	Alternative Electrical Transmission Line Routes .....	3-74
3.3.8.1	Guiding Principles.....	3-74
3.3.8.2	Route Evaluation Methods .....	3-74
3.3.8.2.1	Data Sources .....	3-74
3.3.8.2.2	Rankings .....	3-75
3.3.8.3	Constraints .....	3-75
3.3.8.4	Potential Routes .....	3-76
3.3.8.5	Route Alternatives Analysis Results.....	3-77
3.3.9	Alternative Options for Decommissioning, Reclamation and Closure.....	3-85

3.3.10	Alternative Options for Fish Habitat Offsetting .....	3-85
3.4	DESCRIPTION OF PROJECT PHASES AND ACTIVITIES .....	3-87
3.4.1	Construction .....	3-90
3.4.1.1	Site Preparation of Open Pit, Tailings Storage Facility (TSF), and Buildings and Ancillary Facilities .....	3-91
3.4.1.1.1	Surveying .....	3-91
3.4.1.1.2	Geotechnical Investigations .....	3-91
3.4.1.1.3	Clearing.....	3-91
3.4.1.1.4	Grubbing .....	3-92
3.4.1.1.5	Removal and Stockpiling of Topsoil and Overburden .....	3-92
3.4.1.1.6	Grading and Leveling.....	3-92
3.4.1.2	Physical Construction and Installation of Project Facilities.....	3-92
3.4.1.2.1	Construction of Surface Facilities .....	3-92
3.4.1.2.2	Quarrying, Aggregate Crushing, and Concrete Batch Plant .....	3-93
3.4.1.2.3	Development of Starter Pit and Initial Ore Stockpile .....	3-93
3.4.1.2.4	Establishment of Stockpiles and Storage Areas .....	3-93
3.4.1.2.5	Construction of Engineered Drainage and Diversion Channels.....	3-93
3.4.1.2.6	Loss of Bird and Sisson Brooks .....	3-94
3.4.1.2.7	TSF Preparation.....	3-94
3.4.1.2.8	Construction of TSF Embankments, Water Management Ponds, and Ponding of Start-up Water .....	3-97
3.4.1.2.9	Establishment of Water Management System .....	3-99
3.4.1.2.10	Equipment Installation.....	3-99
3.4.1.3	Physical Construction of Transmission Lines and Associated Infrastructure .....	3-100
3.4.1.4	Physical Construction of Realigned Fire Road, New Site Access Road, and Internal Site Roads .....	3-101
3.4.1.4.1	Construction of Watercourse Crossings.....	3-102
3.4.1.5	Implementation of Fish Habitat Offsetting/Compensation Plan .....	3-102
3.4.1.6	Emissions and Wastes .....	3-103
3.4.1.6.1	Air Contaminant Emissions.....	3-103
3.4.1.6.2	Sound and Vibration Emissions .....	3-106
3.4.1.6.3	Surface Run-Off .....	3-108
3.4.1.6.4	Solid Waste Disposal .....	3-108
3.4.1.7	Transportation .....	3-108
3.4.1.8	Employment and Expenditure .....	3-109
3.4.2	Operation.....	3-110
3.4.2.1	Mining .....	3-110
3.4.2.1.1	Open Pit Mine Operation .....	3-110
3.4.2.1.2	Drilling .....	3-111
3.4.2.1.3	Loading .....	3-112
3.4.2.1.4	Mining Schedule .....	3-113
3.4.2.1.5	Detailed Mine Plan.....	3-114

3.4.2.2	Ore Processing .....	3-115
3.4.2.2.1	Milling/Grinding .....	3-115
3.4.2.2.2	Flotation .....	3-123
3.4.2.2.3	Tungsten Concentrate Refining to APT .....	3-124
3.4.2.2.4	Packaging .....	3-128
3.4.2.2.5	Reagents.....	3-128
3.4.2.3	Mine Waste and Water Management .....	3-129
3.4.2.3.1	Tailings Storage Facility .....	3-129
3.4.2.3.2	Tailings Storage in TSF .....	3-130
3.4.2.3.3	Waste Rock Storage in TSF .....	3-131
3.4.2.3.4	Water Management in the TSF .....	3-131
3.4.2.3.5	Dewatering of the Open Pit.....	3-121
3.4.2.3.6	Collection and Management of Mine Contact Water.....	3-121
3.4.2.3.7	Surplus Water Treatment, Release and Monitoring .....	3-121
3.4.2.3.8	Fresh Water Supply .....	3-124
3.4.2.4	Linear Facilities Presence, Operation and Maintenance .....	3-124
3.4.2.4.1	Operation and Maintenance of the Transmission Lines.....	3-124
3.4.2.4.2	Operation and Maintenance of Site Access Road and Internal Site Roads.....	3-124
3.4.2.5	Emissions and Wastes .....	3-125
3.4.2.5.1	Air Contaminant Emissions.....	3-125
3.4.2.5.2	Sound and Vibration Emissions .....	3-133
3.4.2.5.3	Treated Surplus Water Release.....	3-134
3.4.2.5.4	Mining Waste Disposal .....	3-135
3.4.2.5.5	Non-Mining Solid Waste Disposal.....	3-138
3.4.2.6	Transportation .....	3-138
3.4.2.7	Employment and Expenditure .....	3-139
3.4.3	Decommissioning, Reclamation and Closure.....	3-140
3.4.3.1	Site Description at Closure .....	3-141
3.4.3.2	Activities during Decommissioning, Reclamation and Closure.....	3-141
3.4.3.2.1	Decommissioning.....	3-142
3.4.3.2.2	Reclamation .....	3-142
3.4.3.2.3	Closure.....	3-144
3.4.3.2.4	Post-Closure .....	3-151
3.4.3.3	Emissions and Wastes .....	3-153
3.4.3.4	Transportation .....	3-153
3.4.3.5	Employment and Expenditure .....	3-154
3.4.3.6	Estimated Decommissioning, Reclamation and Closure Costs.....	3-154
3.4.3.6.1	Capital Construction Costs, Long-Term Maintenance, Monitoring and Water Treatment .....	3-154
3.4.3.6.2	Ongoing Post-Closure Expenses .....	3-155
3.4.3.6.3	Cost Estimate Methodology .....	3-155
3.4.3.6.4	Estimate Breakdown .....	3-157

3.4.3.6.5 Description of Bonds ..... 3-159  
 3.4.3.7 Site Safety and Security ..... 3-161

---

**4.0 REGULATORY FRAMEWORK, SCOPING, AND CONSULTATION AND ENGAGEMENT ..... 4-1**

4.1 REGULATORY FRAMEWORK..... 4-1

4.1.1 Environmental Impact Assessment ..... 4-1

4.1.1.1 *Canadian Environmental Assessment Act* ..... 4-1

4.1.1.2 *New Brunswick Environmental Impact Assessment Regulation* ..... 4-4

4.1.1.3 Harmonized Environmental Impact Assessment ..... 4-5

4.1.1.4 Terms of Reference ..... 4-5

4.1.2 Other Legislation Applicable to the Project ..... 4-6

4.1.2.1 Federal ..... 4-6

4.1.2.2 Provincial ..... 4-7

4.1.3 Other Approvals, Permits, and Authorizations ..... 4-7

4.2 SCOPE OF ASSESSMENT ..... 4-10

4.2.1 Scope of the Project ..... 4-10

4.2.2 Factors to be Considered ..... 4-11

4.2.2.1 Federal Environmental Assessment ..... 4-12

4.2.2.2 Provincial Environmental Impact Assessment ..... 4-13

4.2.3 Scope of Factors to be Considered ..... 4-13

4.3 CONSULTATION AND ENGAGEMENT ..... 4-14

4.3.1 Engagement Methods and Activities ..... 4-14

4.3.1.1 Public and Stakeholder Engagement ..... 4-14

4.3.1.2 Aboriginal Engagement ..... 4-25

4.3.2 Summary of Key Issues Raised During Stakeholder Consultation and First Nations Engagement Activities ..... 4-31

4.3.3 Assertions of Aboriginal and Treaty Rights to Northcliff/SML by Aboriginal Peoples ..... 4-41

4.3.4 Future Consultation and Engagement Plans ..... 4-41

4.4 SELECTION OF VALUED ENVIRONMENTAL COMPONENTS ..... 4-41

4.5 IDENTIFICATION OF OTHER PROJECTS OR ACTIVITIES THAT HAVE BEEN OR WILL BE CARRIED OUT ..... 4-42

---

**5.0 ENVIRONMENTAL IMPACT ASSESSMENT METHODS ..... 5-1**

5.1 OVERVIEW OF APPROACH..... 5-2

5.2 SCOPING OF THE ASSESSMENT ..... 5-5

5.2.1 Rationale for Selection of Valued Environmental Component, Regulatory Context, and Issues Raised During Engagement ..... 5-6

5.2.2 Selection of Environmental Effects and Measurable Parameters ..... 5-6

5.2.3 Temporal Boundaries ..... 5-7

5.2.4 Spatial Boundaries ..... 5-7

5.2.5 Administrative and Technical Boundaries ..... 5-8

5.2.6	Thresholds for Determining the Significance of Residual Environmental Effects.....	5-8
5.3	EXISTING CONDITIONS.....	5-9
5.4	ENVIRONMENTAL EFFECTS ASSESSMENT .....	5-9
5.4.1	Potential Project-VEC Interactions .....	5-9
5.4.2	Assessment of Project-Related Environmental Effects .....	5-10
5.4.2.1	Potential Project Environmental Effects Mechanisms .....	5-13
5.4.2.2	Mitigation of Project Environmental Effects .....	5-13
5.4.2.3	Characterization of Residual Project Environmental Effects .....	5-13
5.4.3	Assessment of Cumulative Environmental Effects .....	5-14
5.4.3.1	Identification of Other Projects or Activities .....	5-14
5.4.3.2	Screening for Cumulative Environmental Effects .....	5-16
5.4.3.3	Cumulative Environmental Effects Mechanisms .....	5-17
5.4.3.3.1	Use of Temporal Cases .....	5-19
5.4.3.4	Mitigation of Cumulative Environmental Effects .....	5-19
5.4.3.5	Characterization of Residual Cumulative Environmental Effects .....	5-20
5.5	DETERMINATION OF SIGNIFICANCE.....	5-20
5.5.1	Determination of Significance of Residual Project Environmental Effects .....	5-20
5.5.2	Determination of Significance of Residual Cumulative Environmental Effects.....	5-20
5.6	FOLLOW-UP OR MONITORING .....	5-21
5.7	POTENTIAL ACCIDENTS, MALFUNCTIONS AND UNPLANNED EVENTS.....	5-21
<hr/>		
<b>6.0</b>	<b>ENVIRONMENTAL SETTING (SUMMARY OF EXISTING CONDITIONS).....</b>	<b>6-1</b>
6.1	OVERVIEW.....	6-1
6.2	HISTORICAL SETTING .....	6-2
6.2.1	Pre-Contact Period.....	6-2
6.2.2	Historic Period .....	6-3
6.2.2.1	Subsistence .....	6-4
6.2.2.2	Infrastructure .....	6-9
6.2.3	Present Day.....	6-10
6.3	BIOPHYSICAL SETTING.....	6-11
6.3.1	Physiography and Geology .....	6-12
6.3.1.1	Topography and Drainage.....	6-13
6.3.1.2	Surficial Geology and Soils.....	6-14
6.3.1.3	Bedrock Geology .....	6-17
6.3.1.4	Seismicity .....	6-17
6.3.2	Atmospheric Environment .....	6-21
6.3.2.1	Climate .....	6-21
6.3.2.2	Air Quality .....	6-24
6.3.2.3	Sound Quality .....	6-24
6.3.3	Water Resources.....	6-24
6.3.3.1	Local Watersheds.....	6-25
6.3.3.2	Surface Water Quality .....	6-25

6.3.3.3	Groundwater .....	6-25
6.3.4	Aquatic Environment .....	6-26
6.3.4.1	Water Quality .....	6-26
6.3.4.2	Sediment Quality .....	6-26
6.3.4.3	Fish and Fish Habitat .....	6-26
6.3.4.4	Fish Resource Use .....	6-31
6.3.5	Terrestrial, Vegetated, and Wetland Environment .....	6-31
6.3.5.1	Ecoregions .....	6-31
6.3.5.2	Vegetation and Rare Plants .....	6-32
6.3.5.3	Wetlands .....	6-32
6.3.5.4	Wildlife and Wildlife Habitat .....	6-37
6.3.5.5	Environmentally Sensitive Areas .....	6-38
6.4	<b>SOCIOECONOMIC SETTING .....</b>	<b>6-41</b>
6.4.1	Demographic Overview .....	6-41
6.4.1.1	Population .....	6-41
6.4.1.2	Education .....	6-44
6.4.1.3	Employment and Income .....	6-45
6.4.2	Economic Activity .....	6-46
6.4.3	Labour .....	6-46
6.4.4	Land and Resource Use .....	6-47
6.4.4.1	Local Planning .....	6-47
6.4.4.2	Industrial, Commercial, and Institutional Land Use .....	6-48
6.4.4.3	Residential Land Use .....	6-48
6.4.4.4	Recreation .....	6-48
6.4.5	Community Services and Infrastructure .....	6-48
6.4.5.1	Housing and Accommodation .....	6-48
6.4.5.2	Public Infrastructure .....	6-50
6.4.5.3	Emergency Services .....	6-54
6.4.6	Heritage Resources .....	6-56
6.4.6.1	Built Heritage .....	6-56
6.4.6.2	Palaeontological Resources .....	6-59
6.4.6.3	Archaeological Resources .....	6-59
6.4.7	Transportation and Transportation Infrastructure .....	6-59
6.4.7.1	Road .....	6-59
6.4.7.2	Rail .....	6-60
6.4.7.3	Ports .....	6-61
6.4.7.4	Air .....	6-62
<b>7.0</b>	<b>SUMMARY OF KEY PREDICTIVE STUDIES .....</b>	<b>7-1</b>
7.1	AIR QUALITY MODELLING .....	7-3
7.1.1	Dispersion and Deposition Modelling Methodology .....	7-3
7.1.1.1	Model Selection .....	7-3

7.1.1.2	Model Inputs .....	7-3
7.1.1.2.1	Meteorological Data .....	7-4
7.1.1.2.2	Receptor Grid and Terrain Data .....	7-5
7.1.1.2.3	Point Source Characteristics and Emissions Data .....	7-5
7.1.1.2.4	Building Downwash .....	7-9
7.1.1.2.5	Model Outputs, Data Processing, and Interpretation of Results .....	7-10
7.1.1.3	Establishing Background Conditions .....	7-10
7.1.2	Dispersion and Deposition Modelling Results .....	7-12
7.1.2.1	Construction .....	7-12
7.1.2.2	Operation .....	7-15
7.2	GREENHOUSE GAS (GHG) EMISSIONS .....	7-41
7.2.1	Project GHG Emissions Compared to New Brunswick, Canadian, and Global GHG Emissions .....	7-41
7.2.2	Project GHG Emissions Compared to Other Mining Operations in Canada .....	7-41
7.2.3	GHG Emissions Intensity from the Project .....	7-43
7.2.4	Loss of Carbon Dioxide Sinks .....	7-43
7.3	SOUND QUALITY AND VIBRATION MODELLING .....	7-45
7.3.1	Modelling Methodology .....	7-45
7.3.1.1	Sound .....	7-45
7.3.1.2	Vibration .....	7-51
7.3.2	Modelling Results .....	7-51
7.3.2.1	Construction .....	7-51
7.3.2.1.1	Sound .....	7-51
7.3.2.1.2	Vibration .....	7-55
7.3.2.1.3	Sound and Vibration from Blasting .....	7-55
7.3.2.2	Operation .....	7-55
7.3.2.2.1	Sound .....	7-55
7.3.2.2.2	Vibration .....	7-59
7.3.2.2.3	Sound and Vibration from Blasting .....	7-59
7.4	FISH HABITAT LOSS AND PLAN TO OFFSET SERIOUS HARM TO FISH .....	7-61
7.4.1	Overview .....	7-61
7.4.2	Direct Habitat Loss .....	7-61
7.4.2.1	Methodology: Estimating Direct Habitat Loss .....	7-62
7.4.2.2	Results: Direct Habitat Loss .....	7-62
7.4.2.3	Summary of Direct Habitat Loss .....	7-67
7.4.3	Indirect Habitat Loss .....	7-67
7.4.3.1	Indirect Habitat Loss in Residual Watercourse Segments .....	7-67
7.4.3.2	Indirect Habitat Loss in Napadogan Brook .....	7-70
7.4.3.3	Indirect Habitat Loss in McBean Brook .....	7-78
7.4.3.4	Summary of Indirect Habitat Loss .....	7-81
7.4.4	Total Estimated Fish Habitat Loss .....	7-82
7.4.5	Offsetting Plan for Serious Harm to Fish and Fish Habitat .....	7-82
7.4.5.1	Regulatory Overview .....	7-82

7.4.5.2	Estimated Amount of Fish Habitat Offsetting Required .....	7-83
7.4.5.3	Fish Habitat Offsetting Opportunities.....	7-83
7.4.6	Estimate of the Offsetting Credit .....	7-92
7.4.7	Supplementary Small-Scale Habitat Enhancement Opportunities .....	7-93
7.5	<b>GEOCHEMICAL CHARACTERIZATION OF WASTE MATERIALS</b> .....	7-95
7.5.1	ML/ARD Assessment Methods .....	7-95
7.5.1.1	Geological Context for ML/ARD Potential .....	7-95
7.5.1.2	Barren Rock, Pit Walls, and Mid-Grade Ore.....	7-96
7.5.1.3	Quarry Rock (Borrow).....	7-97
7.5.1.4	Tailings .....	7-97
7.5.1.5	QA/QC Measures .....	7-98
7.5.1.6	ARD Potential Classification Criteria .....	7-98
7.5.2	Sisson Waste Material ML/ARD Characterization.....	7-98
7.5.2.1	Barren Rock Characterization .....	7-98
7.5.2.2	Pit Walls Characterization .....	7-100
7.5.2.3	Mid-Grade Ore Characterization .....	7-101
7.5.2.4	Quarry Rock Characterization .....	7-101
7.5.2.5	Tailings ML/ARD Potential.....	7-101
7.5.3	Drainage Chemistry Predictions.....	7-103
7.6	<b>WATER QUALITY AND WATER BALANCE MODELLING</b> .....	7-105
7.6.1	Water Management Plan.....	7-105
7.6.1.1	General.....	7-105
7.6.1.1.1	Water Management during Construction.....	7-105
7.6.1.1.2	Water Management during Operation .....	7-105
7.6.1.1.3	Water Management during Decommissioning, Reclamation and Closure ..	7-106
7.6.2	Operational Water Balance Model .....	7-108
7.6.2.1	General.....	7-108
7.6.2.2	Model Inputs and Assumptions .....	7-109
7.6.2.2.1	Climatic Conditions.....	7-109
7.6.2.3	Water Balance Results .....	7-112
7.6.3	Predictive Water Quality Model .....	7-113
7.6.3.1	Introduction and Modelling Objectives.....	7-113
7.6.3.2	Project Timeline.....	7-116
7.6.3.2.1	Operation (Years 1-27).....	7-116
7.6.3.2.2	Closure (Years 28-39).....	7-116
7.6.3.2.3	Post-Closure (Years 40 Onward) .....	7-117
7.6.3.3	Mass Balance and Water Quality Model Description .....	7-117
7.6.3.3.1	Water Quality Calculations .....	7-117
7.6.3.3.2	Parameters.....	7-118
7.6.3.4	Inputs and Assumptions .....	7-118
7.6.3.4.1	General .....	7-118
7.6.3.4.2	Climate, Hydrology, and Groundwater .....	7-119
7.6.3.4.3	Geochemical Source Terms.....	7-119

7.6.3.4.4	Water Treatment Plant .....	7-120
7.6.3.4.5	Baseline Water Quality .....	7-120
7.6.3.5	Results .....	7-122
7.6.3.5.1	General .....	7-122
7.6.3.5.2	Guidelines for Comparison .....	7-123
7.6.3.5.3	Results .....	7-124
7.7	HUMAN HEALTH AND ECOLOGICAL RISK ASSESSMENT (HHERA) .....	7-145
7.7.1	Human Health and Ecological Risk Assessment Methodology .....	7-146
7.7.2	Project Site Characterization and Environmental Quality Model Predictions .....	7-149
7.7.2.1	Contaminants of Potential Concern (COPCs) .....	7-150
7.7.2.1.1	COPC Identification .....	7-150
7.7.2.1.2	COPC Screening Based on Soil Quality Guidelines .....	7-153
7.7.2.1.3	COPC Screening Based on Relative Toxic Potential of Ore .....	7-153
7.7.2.1.4	COPC Screening Based on Water Quality Guidelines .....	7-154
7.7.2.1.5	Summary of COPC Screening .....	7-154
7.7.2.2	Existing and Predicted Future Contaminant Concentrations in the Environment .....	7-157
7.7.2.2.1	Air .....	7-159
7.7.2.2.2	Soil .....	7-161
7.7.2.2.3	Surface Water .....	7-161
7.7.2.2.4	Groundwater .....	7-162
7.7.2.2.5	Vegetation .....	7-163
7.7.2.2.6	Soil Invertebrates .....	7-165
7.7.2.2.7	Small Mammals .....	7-166
7.7.2.2.8	Game .....	7-166
7.7.2.2.9	Fish Tissue .....	7-168
7.7.2.2.10	Sediment .....	7-169
7.7.2.2.11	Benthic Invertebrates .....	7-170
7.7.3	Human Health Risk Assessment (HHRA) .....	7-171
7.7.3.1	Problem Formulation .....	7-171
7.7.3.1.1	Receptor Identification and Characterization .....	7-172
7.7.3.1.2	Exposure Pathway Screening and Conceptual Site Model .....	7-174
7.7.3.2	Hazard Assessment .....	7-177
7.7.3.2.1	Toxicological Reference Values (TRVs) .....	7-177
7.7.3.2.2	Selection of TRVs .....	7-178
7.7.3.3	Exposure Assessment .....	7-181
7.7.3.3.1	Exposure Point Concentrations (EPCs) .....	7-181
7.7.3.3.2	Calculation of Average Daily Dose .....	7-182
7.7.3.4	Risk Characterization .....	7-182
7.7.3.4.1	Non-Cancer Causing Contaminants .....	7-183
7.7.3.4.2	Cancer-Causing Contaminants .....	7-183
7.7.3.4.3	Risk Characterization Results .....	7-184

7.7.3.5	Uncertainty Analysis .....	7-196
7.7.3.5.1	Uncertainties in Toxicological Information.....	7-196
7.7.3.5.2	Sensitive Populations .....	7-197
7.7.3.5.3	Uncertainties in Exposure Assessment.....	7-197
7.7.3.5.4	Receptor Characteristics .....	7-198
7.7.3.5.5	Uncertainties in Risk Characterization .....	7-198
7.7.4	Ecological Health Assessment (ERA) .....	7-198
7.7.4.1	Ecological Receptor Identification and Characterization .....	7-199
7.7.4.2	Ecological Receptor Profiles.....	7-200
7.7.4.2.1	Masked Shrew.....	7-200
7.7.4.2.2	Meadow Vole .....	7-201
7.7.4.2.3	Snowshoe Hare.....	7-201
7.7.4.2.4	Red Fox.....	7-201
7.7.4.2.5	American Mink .....	7-202
7.7.4.2.6	Moose .....	7-202
7.7.4.2.7	Black Bear.....	7-203
7.7.4.2.8	American Robin.....	7-203
7.7.4.2.9	Red-tailed Hawk.....	7-203
7.7.4.2.10	American Black Duck .....	7-204
7.7.4.2.11	Belted Kingfisher .....	7-204
7.7.4.2.12	Ruffed Grouse .....	7-205
7.7.4.2.13	Bald Eagle.....	7-205
7.7.4.2.14	Soil Invertebrates and Terrestrial Plants .....	7-206
7.7.4.2.15	Benthic Invertebrates .....	7-206
7.7.4.3	Ecological Receptor Locations .....	7-206
7.7.4.3.1	Exposure Pathway Screening .....	7-206
7.7.4.4	Exposure Assessment.....	7-210
7.7.4.4.1	Calculation of Average Daily Dose.....	7-210
7.7.4.5	Hazard Assessment .....	7-210
7.7.4.6	Toxicological Reference Values .....	7-211
7.7.4.7	Ecological Risk Characterization .....	7-212
7.7.4.7.1	Risk Characterization for Terrestrial Ecological Receptors .....	7-213
7.7.4.7.2	Risk Characterization for Aquatic Ecological Receptors .....	7-226
7.7.4.7.3	Risk Characterization for Semi-Aquatic Ecological Receptors.....	7-227
7.7.4.7.4	Risk Characterization for Soil Invertebrates and Terrestrial Plants.....	7-232
7.7.4.7.5	Risk Characterization for the Sediment Community.....	7-236
7.7.4.8	Ecological Risk Uncertainty Assessment .....	7-237
7.7.4.8.1	Habitat Survey and Receptor Selection .....	7-237
7.7.4.8.2	Utilization of Receptors as Sentinels to Represent Other Organisms.....	7-237
7.7.4.8.3	Receptor-Specific Toxicity Data .....	7-238
7.7.4.8.4	Food Chain Interactions .....	7-238
7.7.4.8.5	Wildlife Exposure Factors.....	7-238

7.7.4.8.6 Measurement Endpoints from the Toxicity Data .....7-238  
 7.7.4.8.7 Modelling Assumptions .....7-239  
 7.7.5 Summary .....7-239

## LIST OF TABLES

## (VOLUME 1)

Table E.1 Summary of the Significance of Residual Environmental Effects ..... E-8  
 Table 1.3.1 Project Team – Sisson Project .....1-11  
 Table 2.2.1 Estimated Tungsten Mine Production by Major Producing Country (2013).....2-3  
 Table 2.2.2 Estimated Molybdenum Mine Production by Major Producing Country (2012) .....2-5  
 Table 3.1.1 Mineral Claims Held By SML .....3-4  
 Table 3.1.2 Mineral Resource Estimate .....3-9  
 Table 3.2.1 Mobile Mining Equipment .....3-17  
 Table 3.3.1 Results of TSF Site Alternatives Analysis.....3-66  
 Table 3.3.2 Potential Route Ranking Calculation Example .....3-75  
 Table 3.3.3 Electrical Transmission Line Route Alternatives Analysis Results .....3-77  
 Table 3.4.1 Description of Project Phases, Activities, and Physical Works.....3-87  
 Table 3.4.2 TSF Staging.....3-97  
 Table 3.4.3 Heavy Equipment Used – Construction.....3-103  
 Table 3.4.4 Criteria Air Contaminant (CAC) Emissions – Fuel Combustion in On-site  
 Construction Equipment – Construction .....3-104  
 Table 3.4.5 Greenhouse Gas (GHG) Emissions – Fuel Combustion in On-site  
 Construction Equipment – Construction .....3-104  
 Table 3.4.6 Criteria Air Contaminant (CAC) Emissions – Vehicle Fuel Combustion –  
 Construction .....3-105  
 Table 3.4.7 Greenhouse Gas (GHG) Emissions – Vehicles Fuel Combustion –  
 Construction .....3-105  
 Table 3.4.8 Particulate Matter from Unpaved Roads – Construction .....3-106  
 Table 3.4.9 Sound Inventory – Construction .....3-107  
 Table 3.4.10 Project Traffic – Construction .....3-107  
 Table 3.4.11 Typical Equipment Vibration (Peak Particle Velocity) – Construction.....3-107  
 Table 3.4.12 Average Daily Traffic (ADT) Generated During Construction .....3-109  
 Table 3.4.13 Construction Expenditures .....3-109  
 Table 3.4.14 Mining Schedule by Phase and Year, and Total Kilotonnes (kt) Mined.....3-114  
 Table 3.4.15 Ore Processing Reagents .....3-128  
 Table 3.4.16 TSF Water Quality Predictions - Operation .....3-122  
 Table 3.4.17 Predicted Discharge Water Quality to Sisson Brook for Treated Parameters –  
 Operation.....3-123  
 Table 3.4.18 Heavy Equipment Used – Operation .....3-126  
 Table 3.4.19 Criteria Air Contaminant (CAC) Emissions – Fuel Combustion in Mining and  
 Support Equipment – Operation .....3-127  
 Table 3.4.20 Greenhouse Gas (GHG) Emissions – Fuel Combustion in Mining and Support  
 Equipment – Operation.....3-127

Table 3.4.21	Criteria Air Contaminant (CAC) Emissions – Vehicle Fuel Combustion – Operation.....	3-128
Table 3.4.22	Greenhouse Gas (GHG) Emissions – Vehicle Fuel Combustion – Operation.....	3-128
Table 3.4.23	Particulate Matter Emissions – Primary Crusher – Operation .....	3-128
Table 3.4.24	Point Source Emissions – APT Plant – Operation.....	3-129
Table 3.4.25	Point Source Criteria Air Contaminant (CAC) Emissions – Package Boiler - Operation.....	3-129
Table 3.4.26	Point Source Metals Emissions – Package Boiler – Operation .....	3-129
Table 3.4.27	Point Source Greenhouse Gas (GHG) Emissions – Package Boiler – Operation.....	3-130
Table 3.4.28	Criteria Air Contaminant (CAC) Emissions – Explosive Detonation – Operation ..	3-130
Table 3.4.29	Particulate Matter Emissions – Material Handling and Transfer Points – Operation.....	3-131
Table 3.4.30	Particulate Matter from Unpaved Roads – Operation.....	3-131
Table 3.4.31	Particulate Matter Emissions – Crushed Ore Stockpile – Operation .....	3-132
Table 3.4.32	Particulate Matter Emissions – TSF Beaches – Operation.....	3-132
Table 3.4.33	Average Trace Metals Concentration in the Ore .....	3-132
Table 3.4.34	Sound Inventory – Operation.....	3-133
Table 3.4.35	Project Traffic – Operation.....	3-134
Table 3.4.36	Average Daily Traffic (ADT) Generated During Operation .....	3-139
Table 3.4.37	Total Operating Expenditures.....	3-139
Table 3.4.38	Operating Expenditures by Year .....	3-140
Table 3.4.39	Predicted Post-Closure Water Quality for Treated Parameters.....	3-152
Table 3.4.40	Bonding Summary .....	3-161
Table 4.1.1	<i>Law List Regulations</i> Triggers for the Project.....	4-2
Table 4.1.2	Potential Legislation and Permits, Approvals, and Authorizations That May Apply to the Project .....	4-8
Table 4.3.1	Summary of FNEAWG and Other Meetings Held.....	4-28
Table 4.3.2	Summary of Key Issues or Concerns Identified by the Public and Stakeholder Groups During Consultation and Engagement Activities, and Associated Responses or Actions Taken.....	4-31
Table 4.5.1	Other Projects or Activities for Consideration of Cumulative Environmental Effects.....	4-43
Table 5.2.1	Example: Measurable Parameters for ( <i>Name of VEC</i> ).....	5-6
Table 5.4.1	Example: Potential Project Environmental Effects to the ( <i>Name of VEC</i> ) .....	5-9
Table 5.4.2	Example: Summary of Residual Project-Related Environmental Effects on ( <i>Name of VEC</i> ) .....	5-11
Table 5.4.3	Criteria for Identification of Other Projects or Activities That Have Been or Will Be Carried Out, for the Cumulative Environmental Effects Assessment.....	5-15
Table 5.4.4	Example: Potential Cumulative Environmental Effects to the ( <i>Name of VEC</i> ) .....	5-16
Table 5.4.5	Example: Summary of Residual Cumulative Environmental Effects on the ( <i>Name of VEC</i> ) .....	5-18

Table 5.7.1	Example: Potential Interactions between VECs and ( <i>Accident / Malfunction / Unplanned Event 1</i> ).....	5-21
Table 6.3.1	Climate Normals – Fredericton Airport (1971-2001).....	6-23
Table 6.3.2	Species At Risk and Species of Conservation Concern with Records Near the Project .....	6-38
Table 6.4.1	Population and Population Change: New Brunswick, York County, and Carleton County, 2006-2011 .....	6-41
Table 6.4.2	Aboriginal and Visible Minority Population: New Brunswick, York County, and Carleton County, 2006.....	6-44
Table 6.4.3	Population of Selected New Brunswick Aboriginal Communities (Maliseet), 2012.....	6-44
Table 6.4.4	Incomes in New Brunswick, York County, and Carleton County, 2006.....	6-45
Table 6.4.5	Labour Force Characteristics: New Brunswick, York County, and Carleton County, 2006 .....	6-47
Table 7.1.1	Dispersion Model Input Parameters – Construction Phase, Point Sources.....	7-6
Table 7.1.2	Dispersion Model Input Parameters – Construction Phase, Volume Sources.....	7-6
Table 7.1.3	Dispersion Model Input Parameters – Operation Phase, Point Sources .....	7-9
Table 7.1.4	Dispersion Model Input Parameters – Operation Phase, Area Sources.....	7-9
Table 7.1.5	Dispersion Model Input Parameters – Operation Phase, Volume Sources .....	7-9
Table 7.1.6	Ambient Background Criteria Air Contaminant (CAC) Concentrations Used for Modelling .....	7-11
Table 7.1.7	Ambient Background Non-Criteria Air Contaminant (Non-CAC) Concentrations Used for Modelling.....	7-12
Table 7.1.8	Dispersion Modelling Results – Maximum Predicted Ground-Level Concentrations of Criteria Air Contaminants (CACs) – Construction Phase – On-site Project Sources.....	7-13
Table 7.1.9	Dispersion Modelling Results – Maximum Predicted Ground-Level Concentrations of Criteria Air Contaminants (CACs) – Construction Phase – Off-site Access Road Dust Emissions .....	7-14
Table 7.1.10	Dispersion Modelling Results – Maximum Predicted Ground-Level Concentrations of Criteria Air Contaminants (CACs) – Operation Phase – On-Site Project Sources .....	7-16
Table 7.1.11	Dispersion Modelling Results – Maximum Predicted Ground-Level Concentrations of Criteria Air Contaminants (CACs) – Operation Phase – Off-site Access Road Dust Emissions .....	7-25
Table 7.1.12	Dispersion Modelling Results – Maximum Predicted Ground-Level Concentrations of Non-Criteria Air Contaminants (Non-CACs) – Operation Phase .....	7-26
Table 7.1.13	Dispersion Modelling Results – Maximum Predicted 10-minute Ground Level Concentrations of Odourous Compounds – Operation Phase – Project Alone.....	7-27
Table 7.2.1	Comparison of Estimated Project GHG Emissions to Provincial and Global Totals.....	7-41
Table 7.2.2	Summary of Reported GHG Emissions from Canadian Mines - 2010.....	7-42
Table 7.3.1	Construction Sound Modelling Results – 1-h $L_{eq}$ .....	7-52

Table 7.3.2	Construction Sound Modelling Results – Percent Highly Annoyed .....	7-52
Table 7.3.3	Operation Sound Modelling Results – 1-h $L_{eq}$ .....	7-56
Table 7.3.4	Operation Sound Modelling Results – Percent Highly Annoyed.....	7-56
Table 7.3.5	Estimated Sound Pressure Levels and Peak Particle Velocities Associated with Blasting .....	7-59
Table 7.4.1	Direct Fish Habitat Loss by Major Project Component in the PDA.....	7-65
Table 7.4.2	Reduction in Watershed Area for Residual Stream Segments.....	7-68
Table 7.4.3	Indirect Fish Habitat Loss by Major Project Component.....	7-68
Table 7.4.4	Flow Scenarios for HADD Modelling in Lower Napadogan Brook.....	7-70
Table 7.4.5	Scenario Stream Flow Rates ( $m^3/s$ ) under Baseline Conditions (Pre-development) Case .....	7-76
Table 7.4.6	Scenario Stream Flow Rates ( $m^3/s$ ) under Future Conditions (Development) Case .....	7-76
Table 7.4.7	Reduction of Stream Flow Rates ( $m^3/s$ ) and Percentage Reductions (%) of Future Conditions Compared to Baseline Conditions.....	7-76
Table 7.4.8	Estimated Total Reductions to Habitat Areas for Various Flow Scenarios .....	7-78
Table 7.4.9	Predicted Flow Reductions in McBean Brook Watershed .....	7-81
Table 7.4.10	Summary of Indirect Loss by Category .....	7-81
Table 7.4.11	Summary of Habitat Loss by Category .....	7-82
Table 7.5.1	Summary of Major Rock Types Expected in Barren Rock at Sisson.....	7-95
Table 7.6.1	Operational Water Balance Flow Path Descriptions.....	7-109
Table 7.6.2	Average Hydrometeorological Inputs .....	7-109
Table 7.6.3	Estimated Seepage Rates by Project Phase.....	7-111
Table 7.6.4	Summary of Water Balance Model Timeline .....	7-113
Table 7.6.5	Applicable Water Quality Guidelines and Regulations .....	7-123
Table 7.7.1	Summary of Non-CAC Contaminant of Potential Concern Screening.....	7-155
Table 7.7.2	Maximum 1-hour COPC Concentrations in Ambient Air ( $mg/m^3$ ) .....	7-159
Table 7.7.3	Maximum 24-hour COPC Concentrations in Ambient Air ( $mg/m^3$ ) .....	7-160
Table 7.7.4	Maximum Annual Average COPC Concentrations in Ambient Air ( $mg/m^3$ ).....	7-160
Table 7.7.5	Concentrations in Soil at HHERA Grid G8 ( $mg/kg$ dry weight).....	7-161
Table 7.7.6	Concentrations in Surface Water at HHERA Grid G8 ( $mg/L$ ) .....	7-162
Table 7.7.7	Concentrations in Browse at HHERA Grid G8 ( $mg/kg$ wet weight) .....	7-163
Table 7.7.8	Concentrations in Forage at HHERA Grid G8 ( $mg/kg$ wet weight).....	7-164
Table 7.7.9	Concentrations in Berries at HHERA Grid G8 ( $mg/kg$ wet weight).....	7-164
Table 7.7.10	Concentrations in Soil Invertebrates at HHERA Grid G8 ( $mg/kg$ wet weight) .....	7-165
Table 7.7.11	Concentrations in Small Mammals at HHERA Grid G8 ( $mg/kg$ wet weight).....	7-166
Table 7.7.12	Concentrations in Wild Game at HHERA Grid G8 ( $mg/kg$ wet weight).....	7-168
Table 7.7.13	Concentrations in Whole Fish Tissues at HHERA Grid G8 ( $mg/kg$ wet weight)...	7-169
Table 7.7.14	Concentrations in Fish Carcass Tissues at HHERA Grid G8 ( $mg/kg$ wet weight) .....	7-169
Table 7.7.15	Concentrations in Sediment at HHERA Grid G8 ( $mg/kg$ dry weight).....	7-170
Table 7.7.16	Concentrations in Benthic Invertebrates at HHERA Grid G8 ( $mg/kg$ wet weight) .....	7-171

Table 7.7.17	Human Receptor Characteristics.....	7-173
Table 7.7.18	Rationale for Exposure Pathway Inclusion in the HHRA .....	7-175
Table 7.7.19	Acute Inhalation Toxicological Reference Values.....	7-178
Table 7.7.20	Chronic Inhalation Toxicological Reference Values (Non-Carcinogens).....	7-179
Table 7.7.21	Chronic Inhalation Toxicological Reference Values (Carcinogens).....	7-181
Table 7.7.22	Maximum Acute and Chronic Inhalation Human Health Risks – Criteria Air Contaminants (CACs).....	7-184
Table 7.7.23	Acute and Chronic Inhalation Health Risks at Selected Receptor Locations – Criteria Air Contaminants (CACs).....	7-185
Table 7.7.24	Maximum Acute and Chronic Inhalation Human Health Risks – Non-Criteria Air Contaminants (non-CACs) .....	7-185
Table 7.7.25	Acute and Chronic Inhalation Human Health Risks at Selected Receptor Locations – Non-Criteria Air Contaminants (non-CACs) .....	7-187
Table 7.7.26	Maximum Carcinogenic Human Health Risks Associated with Inhalation.....	7-187
Table 7.7.27	Maximum Non-Carcinogenic Human Health Risks to Toddlers Associated with Soil Exposure .....	7-188
Table 7.7.28	Maximum Carcinogenic Human Health Risks Associated with Soil Exposure .....	7-189
Table 7.7.29	Maximum Non-Carcinogenic Human Health Risks Associated with Ingestion of Water .....	7-189
Table 7.7.30	Maximum Carcinogenic Human Health Risks Associated with Ingestion of Water .....	7-190
Table 7.7.31	Maximum Non-Carcinogenic Human Health Risks Associated with Ingestion of Food .....	7-191
Table 7.7.32	Maximum Non-Carcinogenic Human Health Risks Associated with Ingestion of Game, Fish, and Vegetation.....	7-192
Table 7.7.33	Maximum Carcinogenic Health Risks Associated with Ingestion of Food .....	7-193
Table 7.7.34	Maximum Carcinogenic Human Health Risks Associated with Ingestion of Game, Fish, and Vegetation.....	7-193
Table 7.7.35	Ecological Receptors Identified as Key Indicators of Risk.....	7-200
Table 7.7.36	Rationale for Exposure Pathway Inclusion in the ERA .....	7-207
Table 7.7.37	Maximum Overall Risk Quotients for the Masked Shrew .....	7-213
Table 7.7.38	Maximum Overall Risk Quotients for the Meadow Vole .....	7-214
Table 7.7.39	Maximum Overall Risk Quotients for the Snowshoe Hare.....	7-214
Table 7.7.40	Maximum Overall Risk Quotients for the Red Fox.....	7-215
Table 7.7.41	Maximum Overall Risk Quotients for the Moose .....	7-215
Table 7.7.42	Maximum Overall Risk Quotients for the Black Bear.....	7-216
Table 7.7.43	Maximum Overall Risk Quotients for the American Robin.....	7-221
Table 7.7.44	Maximum Overall Risk Quotients for the Red-tailed Hawk.....	7-222
Table 7.7.45	Maximum Overall Risk Quotients for the Ruffed Grouse.....	7-222
Table 7.7.46	Maximum Overall Risk Quotients for the Bald Eagle.....	7-223
Table 7.7.47	Maximum Overall Risk Quotients for the Mink.....	7-226
Table 7.7.48	Maximum Overall Risk Quotients for the American Black Duck.....	7-226
Table 7.7.49	Maximum Overall Risk Quotients for the Belted Kingfisher.....	7-227

Table 7.7.50	Maximum Overall Risk Quotients for Soil Invertebrates .....	7-233
Table 7.7.51	Maximum Overall Risk Quotients for Terrestrial Plants .....	7-233
Table 7.7.52	Comparison Sediment Concentrations to Canadian Sediment Quality Guidelines.....	7-236

## LIST OF FIGURES

## (VOLUME 1)

Figure E.1	Project Location.....	E-3
Figure 1.1.1	Project Location.....	1-3
Figure 1.2.1	Project Development Area (PDA).....	1-7
Figure 1.3.1	SML’s Principles of Responsible Mineral Development .....	1-13
Figure 2.2.1	Primary Uses for Tungsten in Selected Industrialized Nations (2010) .....	2-2
Figure 2.2.2	Worldwide Tungsten Production and Demand (2004 to 2013).....	2-3
