

GREEN RIVER

Why is this area under consideration?

The Green River proposed site would protect 640 hectares (ha) in Madawaska County. The River, named for its green waters, flows into the upper reaches of the Wolastoq/St. John River.

QUICK FACTS

- 350 ha of the area includes floodplains, riparian habitats and the river itself, which enhance freshwater ecosystem function and health
- Almost entirely old forest, with species such as Yellow Birch and Sugar Maple.
- This area also captures the habitat for the at risk Canada Warbler and Eastern Wood-Pewee.
- Steep riverbank slopes and rich soil allow for many plant species to grow and thrive including Squashberry and Dutchmen's Breeches.

Inform our decision to protect these areas and their long-term care by visiting our interactive map and completing a local knowledge survey [here](#).
