

Emergency Response Asset *Event Radio Kits*

Date in Service: 2016

CAPABILITY OVERVIEW

Event radio kits give RADCOM's team the capability to equip multiple departments with interoperable radios at the scene of an incident/emergency or large event/festival.

An event radio kit is composed of multiple APX 2500 portable or APX 4000 portable radios. Each radio is configured with an event radio fleetmap shown below.

Within the fleetmap, zones A and B are event radio specific talkgroups whereas zones C and D are mutual aid talkgroups common to every fleetmap on the New Brunswick Trunked Mobile Radio system (NBTMR).

Event radios are not only offered to organizations currently utilizing the NBTMR. Any organization can reach out to our Client Service Advisor using the contact info displayed on the bottom left of this page and inquire.

Asset Locations

- St. Stephen, N.B
- Fredericton, N.B.
- St. Andre, N.B.
- Bathurst, N.B.
- Moncton, N.B.
